ABOUT ME

Finance-focused B.Com student pursuing the US CMA(Part 1 scheduled for Jan) with strong capabilities in financial statement analysis, with an academic background in Artificial Intelligence and Machine Learning. Skilled in financial analysis, financial statement analysis, Microsoft Excel, PowerPoint, and data analysis. Built practical projects combining finance, AI, and web technologies, including a financial statement analysis application. Seeking an internship in finance, accounting, financial analysis, or business analytics where I can contribute and develop practical industry experience.

**US CMA CANDIDATE
(IMA, USA)**

Part 1

(Financial Planning, Performance & Analytics)
scheduled for Jan

PROJECTS

Finlens

- FinLens — Financial statement analysis web app
- Live: <https://aaliyay2k.github.io/finlens/> · Code: <https://github.com/aaliyay2k/finlens>
- Developed a web application that turns company financial statements into plain-English health scores, alerts, and investment-style answers.
- Designed a PDF and OCR reader that extracts statement tables from text and scanned annual reports, then explains investability, year-on-year change, and long vs short horizon from the open file.

The Blooms — Personalized Couple Web App

- Live: <https://the-blooms.onrender.com/>
- Code: <https://github.com/aaliyay2k/the-blooms>
- Developed a personalized web application designed for couples to share scheduled digital bouquets, letters, and notes.
- Implemented couple-code access, scheduled morning/night content, notification support, and a history of past messages.
- Designed the experience to work across mobile devices with Home Screen app functionality. (focuses on long distance couple)
