SUMMARY

Full-stack developer at StratgenAI: built and shipped web applications using HTML, CSS, JavaScript, Python, and AI-assisted development (Cursor). Shaip AI intern: matched each source to the correct product-catalog line and closed the task only when name, description, and photo agreed. Built FinLens to extract line items from PDFs, check completeness, and track and reconcile figures in Excel (lookups, pivot tables). Targeting quote creation, order processing, and billing. B.Com pursuing.

EXPERIENCE

Full Stack Developer | StratgenAI | 2026

End-to-end web applications | AI-assisted development (Cursor) | Ahmedabad | stratgenai.in

- Built and shipped full-stack web features for an AI software company — user interface, application logic, and a working handoff that another person could use.
- Developed with modern tools including Cursor, HTML, CSS, JavaScript, and Python: wrote, reviewed, and iterated on code from requirement through test before release.
- Kept front end and back end aligned so each feature was complete — screens, data flow, and basic validation — before it was treated as done.

Data Annotation Intern | Shaip AI

Product catalog matching | completeness and accuracy

- Matched food photos to the live restaurant catalog; submitted a label only when photo, item name, and description lined up.
- Hit quality standards under time pressure by checking customer requirements against the catalog line before close.
- Stopped incomplete files from going through: locate the item, match the title, verify the description, then submit.

FinLens | Independent Project | 2026

Line-item extraction, invoice-style accuracy, Excel tracker | aaliyay2k.github.io/finlens | github.com/aaliyay2k/finlens

- Pulled line items from PDF source files into a fixed layout; did not close a file until totals passed completeness and accuracy checks.
- Tracked and reconciled figures in MS Excel with lookups and pivot tables; kept a Master Tracker log another person could review.
- Wrote a short stakeholder note on each file: what matched, what failed, and the next action.

EDUCATION

Bachelor of Commerce (B.Com) | C.U. Shah University | 2026 - 2029 (pursuing)

Accounting, records, billing concepts.

AIML Coursework, Year 1 | Gujarat University | 2025 - 2026 | CGPA 8.86

Left after Year 1. Not a completed degree.

SKILLS

HTML | CSS | JavaScript | Python (pandas) | AI-assisted development (Cursor) | MS Excel (lookups, pivot tables) | MS Word | MS PowerPoint | MS Office | Internet | Product catalog lookups | Completeness checks | Track and reconcile | Invoice accuracy | Data validation | Quality standards | Stakeholder communication | Attention to detail | SQL | Power BI

US CMA Part 1 candidate, exam January (not yet certified). English, Hindi, Gujarati, Urdu.
